Supporting Students With Autism: Teaching Strategies, Accommodations Requests & Parental Involvement

Tuesday, October 15 ~ 3:00-4:15pm (Eastern)

Once the live date has passed, this training will be available on demand.

Overview

Transition from high school to college is important for every student and/or parents. It is especially important to those students with autism and change can be especially stressful for this population. This presentation will provide ways to provide information to the importance of tasks related to transition for both students and parents or the student's support system. I will also address how to interact with students with autism and to have a better understanding of some may call "unusual" behaviors (lack of eye-contact, inappropriate responses to questions, etc.) and how that can affect classroom learning for all parties.

All accommodations are student specific, but there may be additional accommodations that a student with autism may request (i.e. wearing sunglasses in class). This webinar will address what is reasonable and what is not considered to be a reasonable accommodations under section 504/ADA and what is appropriate documentation. Helping students with autism to become their own self-advocates will be addressed in order to provide them with an opportunity for success beyond college. The webinar will also provide suggestions on university and community partners to provide this population with the best possible opportunity for success. Attainable career goals for students with autism are an important part of the partnership with the student and College Administrators.

Objectives:

- Understanding how to interact with students that have autism
- Evaluate DSS programs and other programs on campus that include students with autism
- Discover how to teach and interact with a student with autism
- Examine how to provide accommodations for students with autism
- Discuss how to inform parents about the difference in accommodations in high school to college
